

Oscar Lai

Senior Product Designer

Employment

Postman - Senior Product Designer Jan 2025 – Present

- Led design efforts on the core product API Client. Simplified complex request workflows for over 30m developers.
- Championed UI excellence in a high-velocity environment, collaborating with engineers to eliminate legacy technical debt and resolve 15+ critical GitHub issues.
- Participated in the rapid design execution of Postman v12, collaborating with executive stakeholders to meet aggressive launch deadlines and pivoting the product toward agentic workflows and AI-native developer experiences.
- Raised the bar for design execution by implementing rigorous Design QA syncs with engineering; bridged the gap between platform squads to standardize component library across Postman platform.

New Relic - Senior Product Designer Jan 2021 – Nov 2024

- Led design efforts across observability including core product areas in APM, Browser, Mobile, OpenTelemetry, and Collaboration.
- Redesigned the Alerts platform resulting in an improved UX and easier adoption. Delivered over 10+ features including redesigned Alert condition builder, compute management, forecast alerts, and improved conditions/policies list.
- Design systems champion, aligned design teams and stakeholders by advocating for the design system, ensuring adoption, and facilitating the contribution process.
- Mentored 2 summer interns, providing guidance on design processes, user research, and feature development.

Hitachi Vantara - Product Designer Apr 2019 – Dec 2020

- Lead designer for Lumada Maintenance Insights leading to continuous collaboration with customers on extended features.
- Led the redesign for Lumada Manufacturing insights, resulted in reduced development time and more consistent designs.
- Organized 3 customer inception workshops and 5 internal workshops with senior leadership to create strategic vision for high level problems.
- Contributed 10+ design components to overall design system.
- Managed a team of 2 UX designers.
